

RENE GERRITSEN

Developer

Career Objective

I aim to expand my over 20 years of experience in PHP, JavaScript, and SQL, aspiring not only to remain at the forefront of software development but also to evolve into roles of a teacher and leader over time. My goal is to contribute my expertise in legacy project modernization and CI/CD implementations to enhance efficiency and innovation in companies that value technological excellence.

Education

	Study
2003-2005	University of Applied Sciences Gelsenkirchen
	Apprenticeship in IT Management
2003-2005	Bimeco Garnhandel GmbH Bocholt
	High School Diploma
1997-1999	Higher Business School Gronau

Skills

PHP/JS/GO/Bash/SQL	90%
Shopware/Magento	75%
React/ExtJs/jQuery/HTMX	75%
CI/CD/Docker/PHPUnit/Git*	90%
Clean/Agile/Pattern/Architecture	85%
AI/Python/Tensorflow/Sympy	65%
Blender/Photoshop/Design	50%

Experience

Software Developer

NFON AG, München

2022 - Present

Responsible for the development and maintenance of the core API for web and mobile applications. Actively involved in the optimization of internal tools, including a translation tool and a call record portal. Played a key role in preparing the core API for the transition to PHP 8, including conducting unit and functional testing. Participated in transitioning a proxy API from PHP to Golang. Developed and implemented a Docker and Composer-based development environment, along with a CI/CD pipeline using Bamboo and Docker Composer. Integrated various interfaces with third-party software, and consistently focused on identifying and addressing bugs and security vulnerabilities. Maintained a steady and focused approach to work, ensuring high performance even during periods of high load.

Software Developer

Check24 Vergleichsportal Hotel, München

2016-2022

Engaged in backend API development, refactoring legacy code, and introducing DB migration scripts and automated tests with PHPUnit. Played a pivotal role in formulating integration guidelines for hotel providers and integrated various providers and channel managers. Focused on performance optimization and innovative solutions in hotel cluster matching and real-time room mapping using advanced technologies like Docker, PHP7, React.js, and more

Software Developer

Wildcat Deutschland GmbH, Gronau

2009-2012

Focused on the conceptual development and implementation of a cross-platform RIA for jewelry customization with 3D preview. Involved in rendering laser production data and managing API-based communication with production partners, including status tracking. Set up and maintained a B2B shop on Shopware 3 for closed customer groups. Developed Shopware 3 plugins for features like closed customer groups, dealer login, and variant upgrades. Customized templates and designs for Shopware 3, developed an iPad 1 app using web technologies without a framework, and maintained brand shops on xt:Commerce. Also contributed to the development of the in-house fcTemplate framework and provided general IT support.
